Anyone can claim aging.
Only a manufacturer can enter depth.

From a **List** to **Depth** — all six line up.

The moment they picture going deeper, Gana group explains itself

(Surface –> Tissue –> cell and gene)

Positioning First

The problem is not that we lack the credentials. It is that we are not using the credentials we hold.

Not what benefit we deliver,
but how deep into biology
we manufacture.

Not a filler company : bio-manufacturing infrastructure.

What changes is the group-level headline sentence, which moves from a shared category claim to a manufacturing position.
