GANA GROUP · BRAND POSITIONING

Not a filler company.
Bio-manufacturing infrastructure.

One change — not what we do, but how we say it.

The problem is not that we lack the credentials. It is that we do not use the ones we already hold.

This is a positioning decision — not a campaign. Positioning is the ground every line, channel and budget stands on, so we set the seat first, and prove it.

> *Nothing is removed. We keep the facility, the affiliates, anti-aging. We change only how the group leads.*

38 registrations · 5 jurisdictions · all under GANA R&D.

United Kingdom	MHRA	Class III — the highest risk class
European Union	EUDAMED	Active manufacturer registration
Brazil	ANVISA	2 registrations · risk class IV
Russia	Roszdravnadzor	8 registrations · four material families
Korea	MFDS	27 registrations · GMP valid to 2027

> *Public records — a foreign regulator already wrote it down. And today, zero of them are on our website.*

Six companies stop being a buffet — and become one pipeline.

The axis is depth: not what benefit we deliver, but how deep into biology we manufacture.

DEPTH

SURFACE	Fillers · dermal materials	GANA R&D
TISSUE	Bio-cellulose wound dressing	GANA R&D
CELL & GENE	AAV vector · plasmid · protein	Dr.Park CDMO · built, cGMP 2026

Only the group’s headline sentence changes — from a shared category claim to a manufacturing position.

FROM

“We care for aging.”

A claim everyone makes — and no one can prove.

TO

“We manufacture — here are the numbers.”

A position only a real maker can hold.

> *Nothing is thrown away. We just start using what we already have.*

We stop describing ourselves — and start handing over numbers.

And step one costs nothing, and can begin today.
